## Double Sheet Ravioli Former RCA 300 C

The RCA 300 C is a machine for the production of double-sheet ravioli suited to the medium scale production. The overlapped twin calibrating rollers at the back allows free access to the die and sheeters been aligned. The system to distribute the filling with rods guarantees the perfect pinching of the ravioli even with fat filling. The technical solutions adopted have allowed to realize a reliable machine with reduced maintenance requirements.

Main technical features:

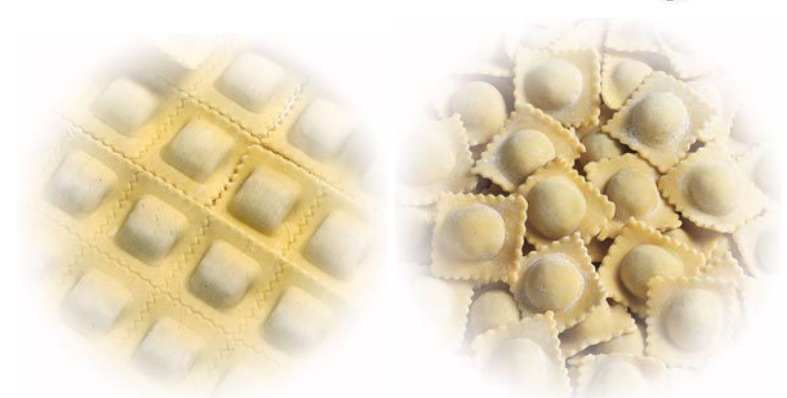

- Interchangeable dies with different shapes: square, round, half-moon and special shapes.
- Mechanical device to extract the ravioli from the cutting roller.
- Continuous filling feeder device also suitable for fat filling, set on castors with quick release for cleaning.
- Filling distribution system by rods with **single injector**.
- Overlapped twin laminating rollers set at the back with independent, mechanical speed adjustment. Independent sheet thickness adjustment.
- Automatic conveyor belts feeding from the rollers to the die.
- Removable outfeed conveyor belt.
- Adjustable machine, filling feeder and die speed by mechanical variator.
- Motor-gearbox and bearings lubricated for life.
- Cams and gears casehardened and tempered.
- Electrical system according to CEI.

On request:

- Scraps cutter and recovery device (for round, half-moon and special shapes).
- Adjustable sheet speed by electronic variator (inverter).

Machine	Unit	RCA 300 C
Hourly Output	Kg	250 – 350
Sheet Width	mm.	300
Size	mm.	1200 x 900 x 1650
