

## Sheet Cutter TA 310

The Automatic Sheet Cutter can produce tagliatelle, fettuccine, tagliolini, and lasagne. It features automatic thickness adjustment, longitudinal and transversal pasta sheet cutting. Compact and versatile, this machine is suited to medium scale production.

Main technical features:

- Structure frame in STAINLESS STEEL on castors; structure in aluminium anodized (on request: in STAINLESS STEEL)
- Interchangeable, longitudinal cutter device
- Adjustable cutter device for lasagne (optional)
- Transversal cutting by rotary, variable speed knife to adjust the length of the shape.
- Conveyor belt for finished product.
- Adjustable single couple of calibrating rollers
- On request: speed variator.
